THERM-A-REST

THERMA-REST® UPDATED FOR 2026

BOOST 650™ SLEEPING BAG

The award-winning Boost is now available in a Regular Wide size, increasing the appeal of this already versatile bag.

PARSEC™ SLEEPING BAG

With new colors and a down fill increase from 800 to 900 fill, the PFAS-free Parsec is even better in 2026.

CORUS™ QUILT

The updated Corus is PFAS-free and comes in new colors for both temperature ratings.

TRAIL PRO™ & TRAIL PRO™ MAX

A Therm-a-Rest staple, the Trail Pro gets a refresh with new shapes, colors and more sustainable fabric to decrease its ecological footprint.

SLEEPING PAD TECHNOLOGY

THERMACAPTURE™

An innovative, proprietary material that reflects radiant heat and minimizes heat loss without adding extra weight or bulk.

TRIANGULAR CORE MATRIX™

Patented technology utilizes two stacked layers of triangular baffles to create a stable surface while minimizing heat loss.

CONTOUR CORE MATRIX™

We modified our industry-best Triangular Core Matrix™ air pad construction with comfort-forward materials so that it contours, cushions, supports, insulates and still packs down small.

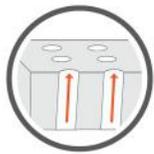

PREMIUM STRETCH KNIT FABRIC

This durable knit fabric is base-layer soft and contours to your body—unlike the woven fabric of other pads—for a pressure-point-free cradling sensation.

PRESSURE-MAPPING

We use pressure-sensitive measurements to vary the support in our pads to provide intentionally placed support and comfort.

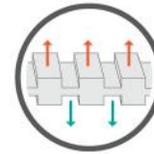

DIE-CUT FOAM

A cut structure that allows for a lower density foam, which means a lighter weight and more compact pad.

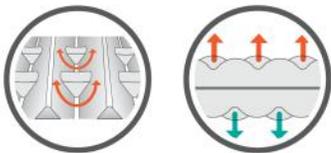

THERMAL FOAMS

Open cell foam structure traps air to deliver a higher R-value foam that provides consistent support and durability.

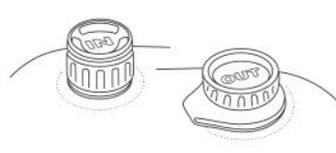

STRATACORE™ FOAM

Yielding the best warmth-to-weight ratio of any self-inflating pad, StrataCore uses a continuous layer of thermal foam nestled between alternating ridges of air and foam.

RIDGEREST & Z LITE

Our unique patterns boost warmth with air-trapping peaks and valleys. Dual-density foam provides a durable and soft sleeping surface. The nesting Z Lite pattern maximizes compactibility.

TWINLOCK™ VALVE

The TwinLock makes using our larger, high-volume pads a dream by utilizing two high-flow one-way valves. One for inflation and one for deflation. Simple.

WINGLOCK™ VALVE

Set off the sleeping surface for maximum utility, the high-flow one-way WingLock makes inflation and deflation a breeze.

SOLUTION-DYED FABRIC

Solution dyeing reduces ecological impact by using less water and energy than traditional methods.

SLEEPING PAD R-VALUE

ITS ALL ABOUT FINDING THE RIGHT PAD

A standardized R-value may allow direct comparison of sleeping pad insulation across brands, but which R-value is the right one? Figuring out the R-value you need is a key step in finding your pad, which is why Therm-a-Rest developed an easy-to-read seasonality chart. We built this seasonality chart as a guide. Variables such as humidity, type of shelter and personal preference all effect how warm a sleeper is on any given night. No chart can replace experience for knowing the right R-value for a personalized sleep system.

NeoAir® XTherm™ NXT Sleeping Pad

With the best warmth-to-weight ratio of any sleeping pad ever created, the XTherm NXT is the top choice for alpinists, backpackers and ultralight travelers chasing cold-weather pursuits.

- **Warmest Air Pad in its Class:** Triangular Core Matrix™ construction and ThermaCapture™ technology deliver a 7.3 R-value, while minimizing weight and bulk.
- **Ultralight:** 15.5 oz (440 g) means warmth without the weight typically needed to stay warm in frigid conditions.
- **Premium Comfort:** At 3 inches (7.6 cm) thick the XTherm NXT delivers exceptional support and comfort.
- **Ultra-Packable:** Packed size rivals that of a conventional 1-liter bottle.
- **Durable:** 70D nylon fabric bottom resists punctures during extensive use.
- **Easy to Inflate & Deflate:** WingLock™ valve is easy to use in freezing conditions, features one-way inflation, and maximizes airflow to make inflating and deflating a breeze.
- Pump sack, stuff sack and repair kit included.

Solar Flare

NeoAir® XLite™ NXT Sleeping Pad

Quieter, thicker and as iconic as ever, this is the next level of the most versatile all-around ultralight air pad.

- **Quieter:** 6x quieter than previous model thanks to a refinement in how the ThermaCapture™ layer is integrated into the Triangular Core Matrix™.
- **Premium Comfort:** At 3 inches (7.6 cm) thick the XLite NXT delivers exceptional support and comfort.
- **Ultralight:** 13 oz (370 g) drives pack weight down by minimizing the weight of an essential sleep system component.
- **Ultra-Packable:** Packs as small as a conventional 1-liter bottle.
- **Elite Warmth:** Triangular Core Matrix construction delivers a 4.5 R-value and class-leading warmth-to-weight ratio, making the XLite NXT ready for three-season and some winter pursuits.
- **Durability:** 30D ripstop nylon offers greater protection from punctures than the competition.
- **Easy to Inflate & Deflate:** WingLock™ valve is easy to use, features one-way inflation, and maximizes airflow to make inflating and deflating a breeze.
- Pump sack, stuff sack and repair kit included.

Ember

NeoLoft™ Sleeping Pad

Car camping comfort with backpacking specs—you've never slept like this in the backcountry.

- **Built to Backpack:** With a weight of 25 oz (Regular size), a packed size not much larger than a 1L water bottle and a 4.7 R-value, you can take car camping comfort deep into the backcountry.
- **3D Sidewall Construction:** A 4-inch-thick profile and a broad squared-off sleep surface is ideal for side sleepers, nighttime movers and any sleeper that likes comfort—so everyone, really.
- **ContourCore Matrix™:** We modified our industry-best Triangular Core Matrix™ air pad construction with comfort-forward materials so that it contours, cushions, supports, insulates and still packs down small.
- **Premium Stretch Knit Fabric:** This durable knit fabric is base-layer soft and contours to your body—unlike the woven fabric of other pads—for a pressure-point-free cradling sensation.
- **Side Rails:** Side rails cradle the sleeper in place and provide a tactile sense of the edge to minimize roll-offs and cold spots.
- **Advanced Valve System:** TwinLock™ Valve technology pairs with seam-sealed pump sack to make inflation a breeze and allows for precise firmness control.
- Stuff sack, high-volume pump sack and repair kit included.

THERMAREST® SLEEPING BAGS, QUILTS & BLANKETS

FAST & LIGHT®

Designed to keep you moving quickly in the hills, our Fast & Light sleeping bags provide you with a lighter pack than you ever thought possible.

BACKPACKING COMFORT

The result of premium materials and pioneering innovation, our Backpacking Comfort sleeping bags are light, compact and spacious to give unrestricted sleep to unrestricted explorers.

CAMP & COMFORT™

Our versatile, insulated blankets are designed for extra warmth during any adventure.

WARMTH YOU CAN TRUST

Our on-site manikin and cold chamber allow us to design products that will perform in the field. Our chamber and independent testing provide temperature ratings for our products. All hooded sleeping bags above 10 degrees Fahrenheit get rated in accordance to EN (European Norm) 13537 and ISO 23537. Our blankets, quilts and non-hooded sleeping bags are given a suggested comfort and limit range that differs slightly from traditional EN ratings, because these products require extra insulation for your head and integration with a mattress. Use these charts to understand the warmth you can expect from Therm-a-Rest products.

Comfort Range & Rating: This is the lowest recommended temperature for a "standard" woman (25 yo, 132 lb (60 kg), 5'2" (157 cm)).

Transition Range & Limit Rating: This is the lowest recommended temperature for a "standard" man (25 yo, 154 lb (70 kg) and 5'7" (170 cm)).

Risk Range & Rating: The sleeping bag should only be used in this range in an emergency, or by those with ample experience in augmenting a bag's warmth.

TEMPERATURE RATING IN ACCORDANCE TO EN 13537 / ISO 23537					
COMFORT RANGE	32° F 0° C	TRANSITION RANGE	LIMIT 20° F -6° C	RISK RANGE	-12° F -24° C

SLEEPING BAG TECHNOLOGY

100% RECYCLED NYLON

Soft-to-the-touch 20D nylon that is 100% recycled and Global Recycle Standard (GRS) certified.

WARMZIP™

Patent-pending center zipper design reduces the bag's internal space and tucks insulation around the sleeper to boost warmth by up to 10F/6C.

HYDROPHOBIC TREATED DOWN

Humanely sourced down insulation with superior heat-retention properties in wet conditions.

RESPONSIBLE DOWN STANDARD

All of our down is certified to the Responsible Down Standard so that you can sleep easy knowing that the waterfowl have been treated humanely.

ERALOFT™ SYNTHETIC INSULATION

Hollow fibers boost heat capabilities while shedding weight. Compressible synthetic insulation repels water and possesses excellent temperature regulation.

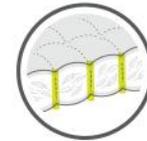

TOE-ASIS™ FOOT WARMER

A baffled pocket of insulation helps rapidly warm cold feet inside of our ergonomic footbox.

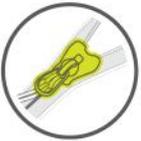

ZONED INSULATION

Intentionally placed insulation puts fill exactly where you need it, maximizing thermal properties while reducing weight.

BOX BAFFLED CONSTRUCTION

To maximize thermal efficiency in key areas, we use mesh box baffles to boost loft and eliminate cold spots at the seams of the sleeping bag or quilt.

YKK® ANTI-SNAG ZIPPER

Special slider design makes midnight ventilation a breeze by preventing annoying and costly snags on the fabric.

QUILT & BLANKET LOOPS

Most of our bags are equipped with quilt and blanket loops, allowing you to securely attach extra insulation to customize your sleep system.

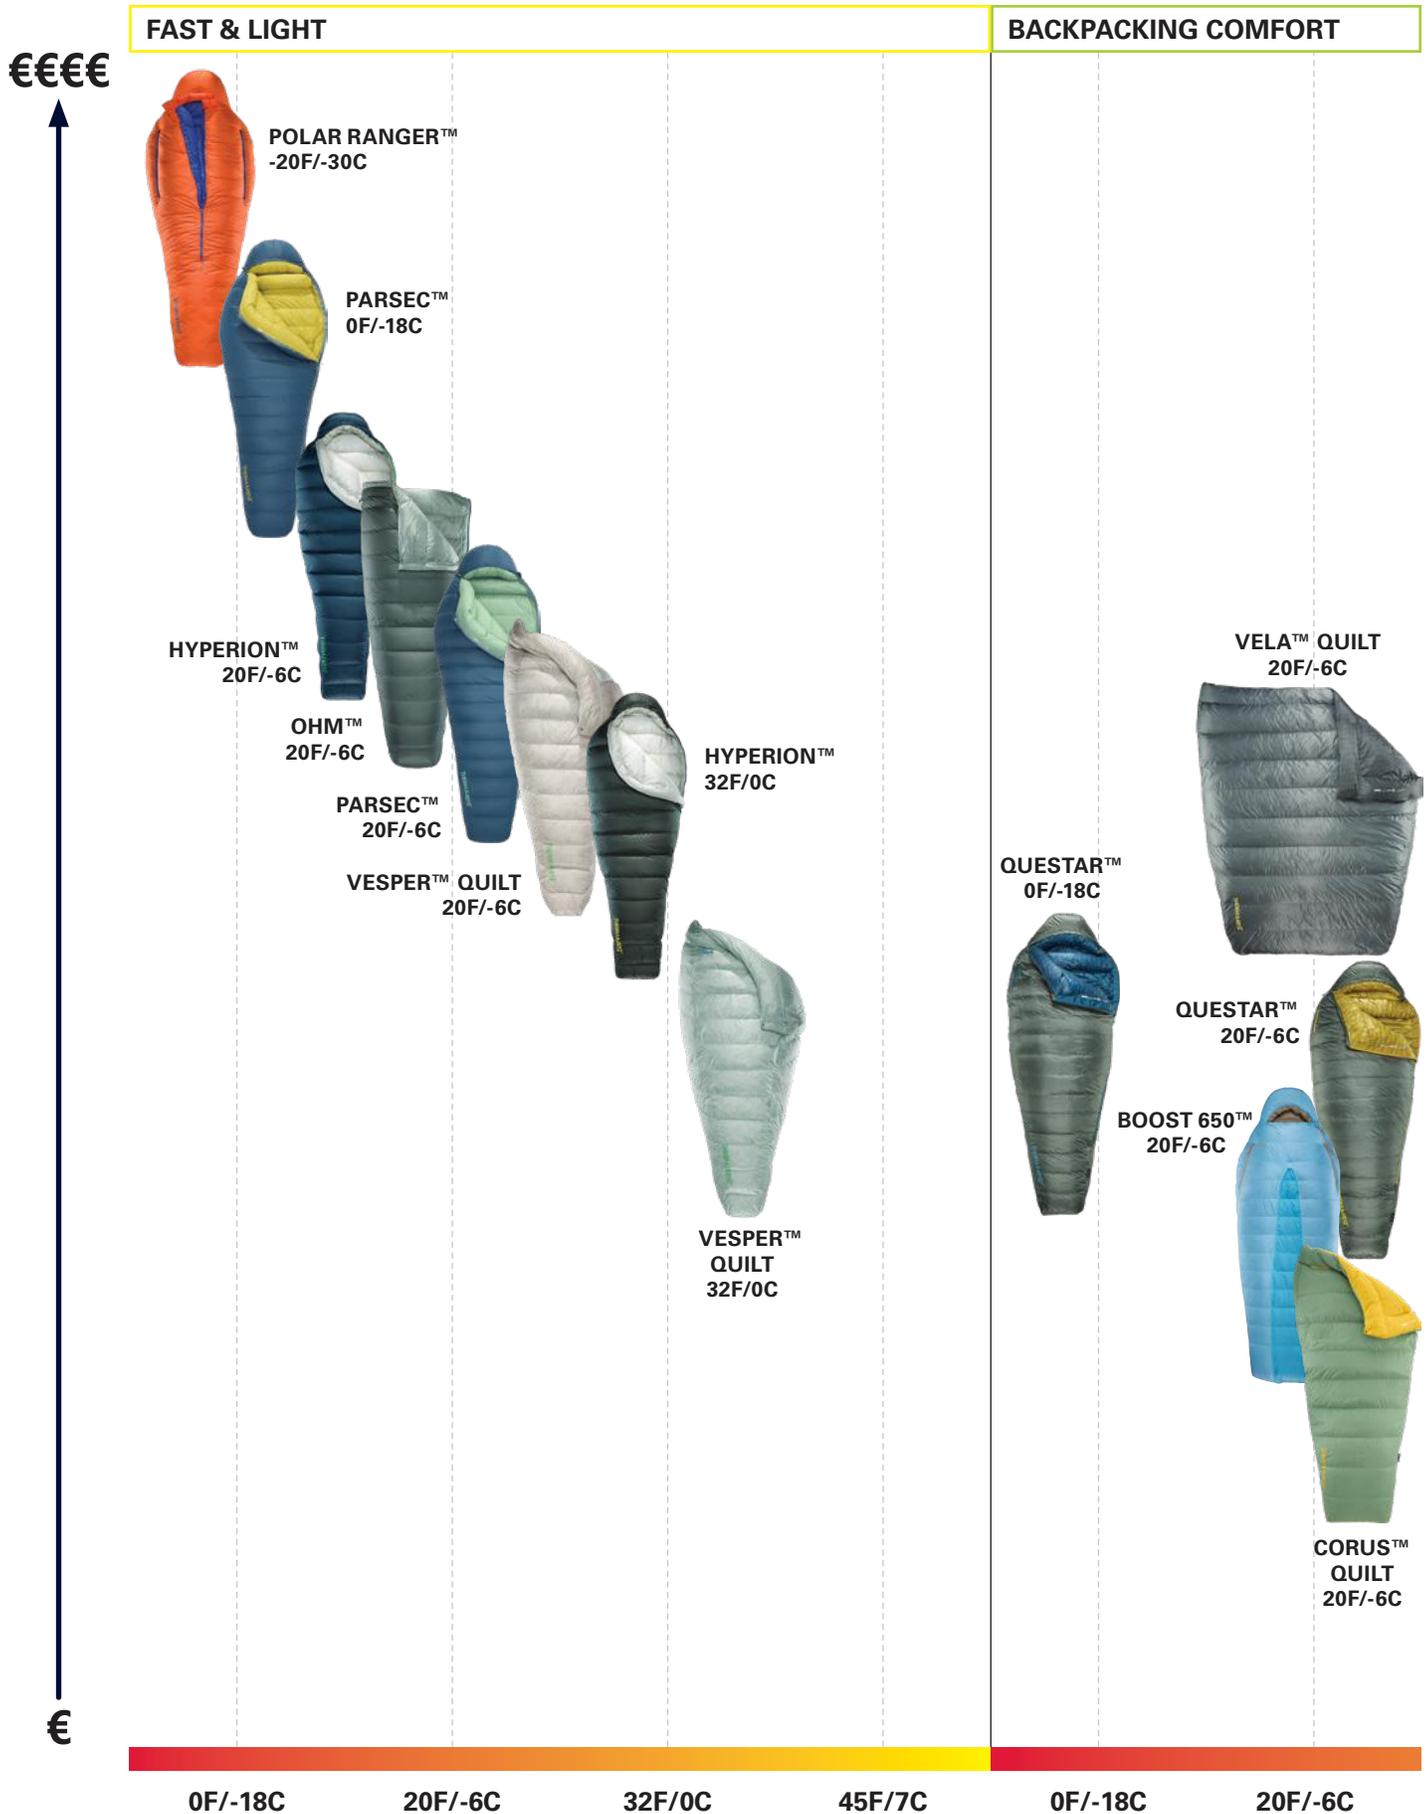

BETTER SLEEP GUARANTEE

For 50 years our designs have been guided by a singular purpose: better sleep outside. Whether it's deep in the backcountry or in the back of a van, you should be getting better sleep in one of our sleeping bags or quilts, which is why we have the Better Sleep Guarantee. If you are not completely satisfied with your sleeping bag or quilt, return it within three months and we will give you a full refund, no questions asked.

Only available in the USA and Canada.

Polar Ranger™ -20F/-30C Sleeping Bag

Designed from years of expedition experience, the award-winning Polar Ranger is equipped to take on the world's most extreme conditions and make them livable.

- **Premium Performance:** 900-fill hydrophobic down, premium shell and lining fabric provide exceptional compressibility and warmth-to-weight ratio.
- **High-Performance Sustainability:** Shell and liner are made of a soft, lightweight, durable and 100% recycled nylon.
- **Full-Featured Snorkel Hood:** Shorter, stiffer snorkel allows easy breathing and ventilates exhaled moisture; magnetic closure keeps cross-drafts at bay and eases entry and exit.
- **Refined Fit:** Tested and perfected in our onsite cold chamber, added girth and precise down distribution achieve optimal thermal efficiency and comfort.
- **Additional Features:** Toe-axis™ Foot Warmer Pocket, overstuffed draft tubes, quilt and blanket loops, cinchable draft collar, and a YKK anti-snag zipper.
- Compression sack and storage sack included.

Boost 650™ 32F/0C Sleeping Bag

Spacious, semi-rectangular bag when you want it, toasty mummy bag when you need it—the lightweight and packable Boost 650 empowers you to truly be comfortable in the backcountry.

- **WarmZip™ Tech:** Patent-pending center zipper design reduces the bag's internal space and tucks insulation around the sleeper to boost warmth by up to 10F/6C.
- **Power to the Sleeper:** Enjoy the spacious freedom of the semi-rectangular bag or the cozy warmth of a mummy bag—pick the shape and temperature that keeps you comfy at night with just a zip.
- **Multi-use Arm Holes:** Reach the WarmZip, read a book, play cards or simply ventilate—do it all while tucked into your sleeping bag.
- **Puffed Up & Zoned Out:** Ample 650-fill RDS-certified hydrophobic down is allocated to key areas with Zoned Insulation to maximize heat retention and minimize overall weight.
- **Eco-conscious Product:** Shell and liner are made of GRS-certified 100% recycled, soft-to-the-touch nylon and coated with PFAS-free DWR.
- **Inclusive Sizing:** Each size—Short, Regular, Long—is also available in a Wide size, so you get the bag you want in the fit you need.
- **Additional Features:** YKK anti-snag zippers, cinchable hood, zipper draft tube, puffed draft collar and a two-way entry zipper.
- Compression sack and storage sack included.

Honcho Poncho™ Down

Be iconic, be multi-functional, and elevate performance with hydrophobic down to achieve the ultimate camp comfort with the Honcho Poncho Down.

- **Premium Down Insulation:** RDS-certified 650-fill hydrophobic down delivers superior wet-weather performance to keep you cozy in all conditions.
- **Refined Fit:** Snap layout and articulated shape maximizes the benefits of a poncho while cutting back on annoying excess fabric that gets in the way when performing tasks like cooking.
- **Compact Packing:** Front pocket doubles as built-in stuff sack for easy and compact on-the-go storage.
- **Thoughtful Features:** Half-length zipper, three-panel fitted hood, quilted pattern, and hanger loop make wearing the Honcho Poncho Down an experience of comfort, functionality, performance and fun.
- **Improved Fabrics:** DWR-coated recycled polyester is water resistant, sustainable and more comfortable without sacrificing durability.

Honcho Poncho™ Kids

In response to popular demand and due to its general awesomeness, the Honcho Poncho now comes in a kids' version.

- **Warm & Light Insulation:** Efficient and compressible, our water-resistant synthetic fill uses hollow fibers to reduce weight without sacrificing warmth.
- **Weather-Ready:** DWR-coated water-resistant shell and hood are perfect for puddle jumping.
- **Cozy:** Perfect any time your kiddo needs a little extra warmth (and a great solution for little ones who never seem to want to wear a jacket).
- **Handy:** Kangaroo pocket keeps little hands warm and top zip pocket stows essentials.
- **Shape-Shifting:** Snaps under the arms transform the poncho into a blanket and back again.
- **Packable:** Packs into its own zip storage pocket.
- **One Size:** Fits most 6- to 12-year-olds.

Compressible Pillow Cinch

Customizable firmness on a compact, environmentally friendly pillow is ideal for on-the-go rest.

- **Customize Comfort:** Cinch cord tightens and loosens the cover to adjust firmness to the right level.
- **Ultra-Soft Recycled Fabric:** Rest easy knowing the gentle cover is made from 60% recycled polyester.
- **Upcycled Foam:** Using excess foam from mattress production makes this product both green and comfy.
- **Compressible:** Packs down into itself so you can rest better on-the-go.

MSR® TENTS & SHELTERS

CLASSIC TENTS, REFRESHED

Two beloved MSR tent families have been refreshed for 2026. The updated Elixir gets a new look and performance improvements, and the all-new Hubba Hubba LT and HD tents brings new aesthetics and performance to the Hubba family. All three models have larger floorplans than ever before to accommodate modern wide sleeping pads like the NeoLoft™, and all receive premium all-metal corner hardware.

EXPANDED FLOORPLANS

Each tent series now offers more living space than ever before, with increased interior volumes that easily accommodate modern wide sleeping pads like the NeoLoft™.

NEW DOOR ZIPPERS

New straight zipper doors increase durability and are easier for campers to use and find in the middle of the night.

NEW CORNER HARDWARE

New premium all-metal hardware increases durability for years of use and elevates tent quality.

UPDATED – ELIXIR™ TENT SERIES

In addition to the size increase and new hardware, the Elixir tents have received a few other updates, ensuring that beginner and comfort-focused backpackers and those looking for a versatile front- and backcountry tent will continue to look to the Elixir as their spacious and durable shelter of choice.

New Look, Always Included Footprint

The updated Elixir has new aesthetics with carefully considered colors and lines but still includes a footprint, perfect for newer users getting into camping and backpacking.

New Coatings

Fabrics and coatings have been updated to improve hydrolysis resistance, making it more waterproof and extending the longevity of the tent.

NEW – HUBBA HUBBA™ LT & HUBBA HUBBA™ HD TENTS

The best-selling Hubba tent family gets two new models for 2026, letting users choose the tent best tailored to their environment and needs. The LT is designed for maximum airflow, lightweight comfort and increased livability; the HD is made for exceptional three-season weather protection without sacrificing comfort or a lighter pack.

Super Breathable

The LT tent body is mostly mesh for peak breathability, condensation management and ultimate star-gazing, and is ideal for warmer climates.

Hubba Hubba LT 2P

Hubba Hubba HD 2P

Storm Stable

Extra included guylines help keep the HD grounded no matter the weather and let users configure their preferred setup or adapt to any camp spot.

Heavy-Duty Fabric Coatings

Fabrics and coatings have been updated to improve hydrolysis resistance, making it more waterproof and extending the longevity of the tent.

IMPROVED VENTS

New large fly vents keep weather out while allowing excellent airflow.

CAMP IN COMFORT

Increased interior volume, large vestibules to store gear, a clothesline and more pockets make the already spacious Hubbas even more enjoyable.

LOWER IMPACT

Solution-dyed fly, floor and mesh fabrics use pre-dyed fibers to minimize water usage and reduce carbon emissions by at least 80% compared to our previous fabrics.

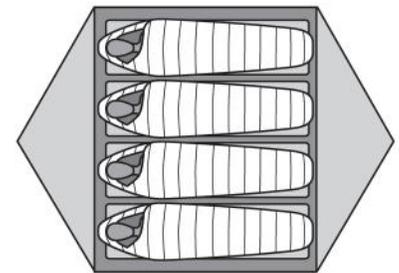

BETTER STUFF SACK

The new side-loading roll-top stuff sack makes putting the tent away faster and easier than a traditional top-loading bag.

MINI-GROUNDHOG™ STAKES

For better performance in all ground conditions, the eight included stakes are everyone's favorite, the Mini-Groundhog.

3+ ADAPTABILITY

The 3-person Hubba in both models are so spacious, they can accommodate four regular NeoLoft pads laid out horizontally.

Olive Night

Hubba Hubba™ HD 1 Tent

Spacious, lightweight comfort for a solo backpacker who's not afraid of a less-than-favorable weather forecast.

- **Maximum 3-season Protection:** Heavy-duty coatings, stable poles and less mesh provide durable weather resistance; larger vestibules protect gear in bad weather.
- **More Space, Less Weight:** True rectangular floor and large interior volume offer more living space for less weight and accommodates a wider sleeping pad.
- **Smart Details:** Extra pockets, rainfly with StayDry™ door, clothesline, new roll-top stuff sack, and easy-to-find, no-curve door zips for quick entry and exit.
- **Easy Setup:** Symmetrical design and locking metal stake loop grommets make tent setup fast and simple.
- **Lower Impact:** Solution-dyed fly, floor and mesh fabrics use pre-dyed fibers to reduce carbon emissions by at least 80% versus our previous fabrics.

Olive Night

Hubba Hubba™ HD 3 Tent

Plenty of room for 3 or even 4 adventurers who want lightweight, reliable weather protection without missing out on camp comforts.

- **Maximum 3-season Protection:** Heavy-duty coatings, stable poles and less mesh provide durable weather resistance; larger vestibules protect gear in bad weather.
- **More Space, Less Weight:** True rectangular floor and large interior volume offer more living space for less weight and accommodates wider sleeping pads.
- **Smart Details:** Extra pockets, rainfly with StayDry™ doors, clothesline, new roll-top stuff sack, and easy-to-find, no-curve door zips for quick entry and exit.
- **Easy Setup:** Symmetrical design and locking metal stake loop grommets make tent setup fast and simple.
- **Lower Impact:** Solution-dyed fly, floor and mesh fabrics use pre-dyed fibers to reduce carbon emissions by at least 80% versus our previous fabrics.

Access™ 1 Tent

Ultralight, four-season solo tent for ski touring and snowshoeing.

- **Ultralight Warmth:** Limited mesh on the tent body keeps in all that hard-earned warmth on cold nights, with an overall weight that's easy to carry.
- **Robust Design:** Unique central-support frame; ultra-durable Easton® Syclone™ poles withstand severe conditions and heavy snow loads.
- **Quick Setup:** Unified hubs and poles with color-coded clips.
- **Additional Features:** Rainfly vents reduce condensation; proven waterproof coating for long-term durability; one door; one internal pocket; multiple guy points.

Front Range™ 4-Person Tarp Shelter

So compact and light, it's hardly noticeable in your pack. The Front Range tarp shelter protects parties of four on giant alpine missions, like spring ski traverses.

- **Ultralight & Spacious:** Comfortably sleeps four with a 5' 4" peak height for gearing up, at just .74 kg (1 lb 10 oz).
- **Quick Setup:** Floorless tarp sets up quickly with ski or trekking poles; ski straps included for easy assembly.
- **Easy Access:** Zippered door rolls back completely on both sides for sweeping views and easy entry.
- **Versatile:** Light enough to carry as a solo shelter, dining hall, or emergency shelter. Optional Bug/Floor Insert available for wet & buggy terrain.
- **Durable:** Steep canopy sheds snow and water and features PEU-waterproof coating for longterm durability.
- Accessory pole sold separately.

WHY CHOOSE A PURIFIER? **MAXIMUM PROTECTION**

As more people visit popular wilderness sites, the risk of viruses increases. Since viruses are too small for microfilters to catch, a quality purifier provides adventurers with a reliable defense. In fact, our most advanced purifiers combat viruses, bacteria and protozoa, sediment, taste and odors, delivering one ultimate tool to do it all.

OUR WORLD-CLASS **RESEARCH, DESIGN & TESTING**

Our on-site water lab is staffed with scientists who individually test our devices to ensure greater safety and ease of use.

Every MSR hollow fiber filter and purifier features:

- **A unique integrity check** that allows the user to easily confirm that, if the device is dropped or frozen, the fibers haven't been damaged and the device is working safely.
- **An end-of-life indicator** stops the filter media from passing water. This clearly identifies that it's time to replace the cartridge without exposing the user to harmful pathogens.
- **Passes NSF Protocol P231** throughout the filter's life. The test confirms microbiological threat removal from a variety of water types, unlike NSF 42 and 53, which aren't suitable tests for backcountry use.

NSF PROTOCOL P231 & P248 **TESTING STANDARDS**

Though backcountry water filters and purifiers are unregulated, NSF Protocol P231 and P248 provide scientifically accepted standards for testing them. Every MSR design passes a stringent test when challenged with what's considered worst-case water (extreme levels of microbes, turbidity, etc.)—even at the end of its life. These standards are the best way to prove a device offers protection against real backcountry water types throughout its useful life.

Guardian™ Gravity Purifier

State-of-the-art, high-volume water purifier—the only gravity system you may ever need.

- **Ultimate Two-Stage Protection:** Hollow fiber removes viruses, protozoa, bacteria and microplastics; activated carbon reduces chemicals, tastes and odors.
- **Easy to Fill:** 10L reservoir fills easily at sinks and wild sources. Universal bottle adapter prevents cross-contamination.
- **High-Flow Cartridge:** Advanced engineering creates fast virus-removing gravity system (1L in 2 min).
- **No Backflushing:** Restore flow by simply opening the purge hose to flush and clean the system.
- **Built for Travel:** Rugged, military-grade construction; fits easily in carry-on.

SIZE	One Size
SKU	14005
DIMENSIONS	10 x 30 x 10 cm (3.9 x 12 x 4 in)
WEIGHT	530 g (18.7 oz)
FILTER MEDIA	Advanced Hollow Fiber
FILTER PORE SIZE	0.02
FLOW RATE	0.5 L/min
CARTRIDGE LIFE	3000+ L

Guardian™ Purifier Pump

The world's most advanced backcountry purifier.

- **Ultimate Protection:** Meets NSF protocol P248 testing standard used by U.S. military for removing viruses, protozoa, bacteria and sediment.
- **Self-Cleaning:** Patent-pending system self-cleans with each stroke, eliminating the need to ever backflush or filter-scrub to maintain flow.
- **Fast, Easy & Long-Lasting:** Purifies 2.5 liters per minute from nearly any source and treats up to 10,000 liters.
- **Rugged Construction:** Stands up to heavy use and extreme environments; hollow fibers withstand freezing.

REAL-WORLD PERFORMANCE— IT'S WHAT FUELS US

STOVE TECH: A LEGACY OF INNOVATION

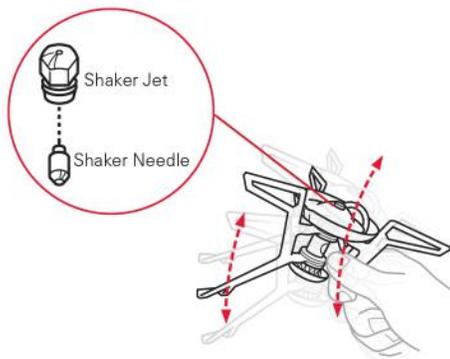

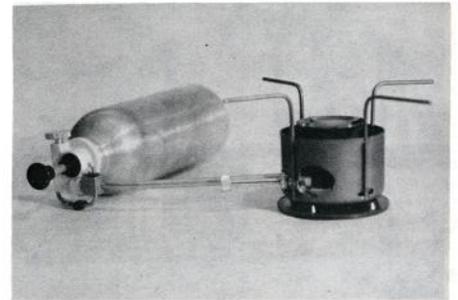

Every MSR® stove ever built has come to fruition with a singular purpose—to solve real world problems. Our forward-thinking innovations have led the industry and broken down barriers to what could be accomplished outdoors. Whether your goal is reaching the world's farthest corners or laying out a feast for friends on a weekend close to home, you can trust MSR to lead the way.

Problem: High Altitude Dehydration

MSR Innovation: Remote Burner Stoves

Introduced in 1973, the Model 9 stove was the first to separate burner and fuel source, allowing the use of a windscreen to significantly boost all-condition performance. In addition, the remotely pressurized fuel tank, crude, multi-fuel capabilities and a myriad of overall design improvements boosted function and efficiency far beyond anything else available. It remains the basis of all liquid fuel designs to this day.

Problem: Fuel Availability/Clogged Stoves

MSR Innovation: Fuel-Specific Shaker Jets

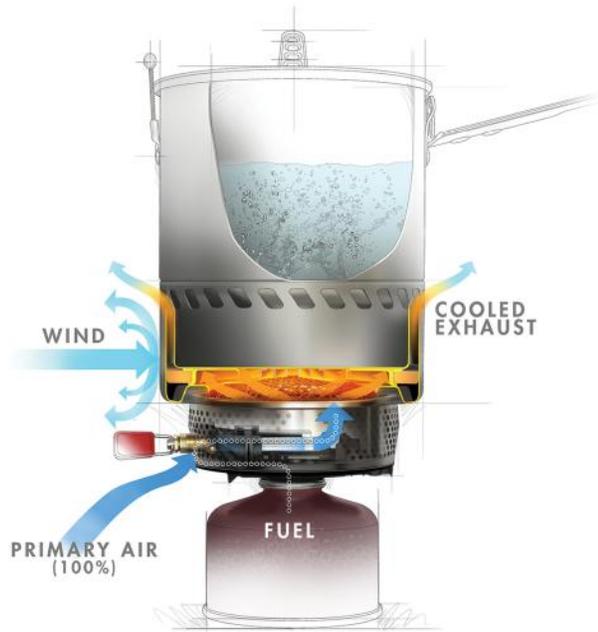

The jet, where pressurized fuel escapes the stove to create a flame, was the Achilles heel of early liquid fuel stoves, especially with unpredictable international fuel sources. Our two-fold solution began with the first field-replaceable jets, sized to match the viscosity and carbon-collecting tendencies of fuels ranging from highly refined white gas to rough-burning diesel fuels. Adding a floating pin inside the jet came next, allowing the stove's jet to be purged of obstructions with a simple shake.

Problem: Reliability

MSR Innovation: Field-Serviceable Stoves

Reliability is the cornerstone of every MSR product, but we also know that people lean hard on our gear in remote places. If something breaks north of the Arctic Circle, it needs to get fixed. That's why we've engineered our liquid-fuel stoves to be virtually resurrect-able from the ground up, with a simple, all-in-one tool and a basic maintenance kit. From cleaning a fuel line in the field to a complete refurbishment on the workbench at home, MSR stoves are built like no others, for generations of reliable performance.

Problem: Stove Efficiency in Windy Conditions

MSR Innovation: Primary Air Combustion

We didn't invent primary air combustion, but we were first to bring it into the backcountry. Typical combustion requires oxygen (secondary air) around and above the flame, as well as from below (primary air). 100% primary air combustion draws all the air needed from below, allowing a completely enclosed flame, significantly boosting the efficiency of combustion. The clear benefits of needing less fuel overall are amplified by the all-condition reliability of a flame impervious to wind, making our Reactor® and WindBurner® stove systems unrivaled in real-world performance.

Problem: Excess Fuel Demands/Heavy Packs

MSR Innovation: Hyper-Efficient Cookware

The efficiency of MSR stove systems would not be possible without cookware engineered to make the most of it. Fully enclosing the burner, our advanced Reactor and WindBurner cook pots are built to not only block wind, but also to maximize heat transfer by trapping hot combustion gases around the pot for longer, and boosting the surface area where that transfer takes place. Like the rest of our cookware, we do it all with the best materials for the job at hand to ensure you can tune your kit to the priorities of any trip.

Problem: Consistent Canister Performance

MSR Innovation: Pressure-Regulated Stoves

Canister stoves rely on the low boiling point of fuel to generate pressure through vaporization inside of the canister. However, internal canister pressure can range from 70 psi in summer to just a few psi in cold temps, with low fuel levels, or during long stove runs. We've optimized our pressure-regulated stoves to operate optimally at low pressures, assuring consistent performance in the widest range of temperatures possible and minimizing wasted fuel.

SWITCH™ STOVE SYSTEM

THE STOVE FOR EVERYONE

The versatility of the Switch stove comes from the unique hemispherical pot and the multi-functional pot supports.

With a simple flip of the pot supports, this solo cook system instantly becomes an adaptable stove that can serve more campers or become a gourmet chef's backcountry kitchen; no accessories needed. In non-system pot mode, the Switch can accommodate a variety of cookware from larger pots that boil pasta to non-stick skillets for your morning eggs.

PRESSURE-REGULATED PERFORMANCE

Very few stoves in this class include a pressure regulator, making the Switch the most reliable performance option for beginner to intermediate adventurers. The pressure regulator provides consistent output in colder temperatures and at altitude where the competition struggles, for true three-season performance. It also maximizes fuel efficiency, so users get the most out of each canister.

In 'system mode', the ring stand supports the Switch pot. Its patent-pending hemispherical bottom is wrapped evenly by the flame, heating quickly and evenly without a heat exchanger. As an everything-included solo system with a built-in piezo ignitor and cup, it's lightweight and compact.

PREMIUM CORK

The premium, removable cork cozy is a more sustainable option with many performance benefits. The cork is burn resistant and won't melt upon accidental contact with heat. It also provides better grip when wet than other materials, minimizing the chance for spills.

Multi

Black

Switch™ Stove System

The most versatile, high-performance system stove in its class.

- **Versatile:** Flip-out pot supports allow users to use the integrated Switch pot or bring their preferred pot (not to exceed 8 in / 20.3 cm diameter; 5 in / 12.7 cm height, 8 lb / 3.6 kg weight).
- **High-performance:** The pressure regulator provides good fuel efficiency, even in cold conditions and higher altitudes, and improves flame control for more precision cooking.
- **Hemispherical Pot:** Patent-pending round-bottom Switch pot heats faster and more evenly than conventional flat-bottom pots.
- **Stable Pot Support:** Ring stand for integrated pot to rest on makes placing the pot on the stove easy and intuitive.
- **Easy to Light:** Built-in piezo ignitor makes lighting the stove simple and fast.
- **Includes:** Switch™ stove; Switch™ pot with lid* and cork cozy; plastic nesting bowl*; canister stand; and PackTowl® cleaning cloth. Room to nest a 4 oz (110 g) IsoPro fuel canister. *BPA-free.

Reactor® Stove Systems

The world's fastest, most fuel-efficient all-condition stove system.

- **Choose Your Volume:** Depending on group size; systems are big enough for melting snow, small enough to go on any journey.
- **Integrated System:** State-of-the-art stove and high-efficiency cookware are combined into a compact, self-contained and easy-to-use system.
- **Unrivaled Boil Time:** Outperforms the competition in head-to-head lab tests—boiling .5 liter of water in just 1.5 minutes—with an even greater advantage out in the real world.
- **Unmatched Wind Protection:** Heat exchanger completely encloses radiant burner head, virtually eliminating the effects of wind to maintain outstanding boil times and save fuel.
- **Compact:** All systems are self-contained, fitting the stove and fuel inside the pot. (1.0L Reactor System nests optimally with our new, smaller-diameter 4 oz. canisters, which are sold separately).

HOW TO CHOOSE MSR BINDINGS

PARAGLIDE™ TRAIL SERIES

Benefit: Intuitive to use, extremely comfortable and made from high-quality materials.

Made for: Entry-level snowshoers who want equipment that offers confidence; more advanced snowshoers who want lighter weight shoes for less technical terrain, and utility users in cold climates who need snowshoes in their everyday lives.

 **Terrain:** Rolling, gentle

PARADIGM™ EXPLORE SERIES

Benefit: Secure performance, lightweight comfort, easy use and repairability.

Made for: Intermediate to advanced level snowshoers who are exploring moderate to technical terrain; beginner snowshoers who know they want to invest in shoes they can grow into over time.

 **Terrain:** Variable

PARAGON™ ASCENT SERIES

Benefit: High-precision foot control for safe travel on steep ascents, challenging sidehills and icy conditions; reliable durability and field repairability.

Made for: Serious winter adventurers who demand superior snowshoes for safe and successful travel in extreme and remote environments.

 **Terrain:** Aggressive, steep

Lightning™ Ascent Snowshoes

The pinnacle of ultralight and aggressive all-terrain performance.

- **Unrivaled Traction:** 360° Traction frames deliver edge-to-edge grip, and durable steel DTX crampons provide serious bite in challenging conditions—delivering unmatched traction in technical terrain.
- **Paragon™ Binding:** Comfortable, freeze-resistant mesh strap wraps securely around a wide range of boots for ultimate security, while toe stops offer fast, precise foot alignment.
- **All-Condition Adaptability:** Attachment points for 5-inch (13-cm) modular flotation tails (sold separately), which provide on-demand flotation for deep powder or when carrying heavier loads.
- **Uphill Efficiency:** Ergo™ Televators reduce fatigue and increase traction on the steeps with an ergonomic design that engages with a flick of a pole grip.

MEET THE EXPANDED QUICKDRAW™ FAMILY

ONE FILTER TO DO IT ALL

Build a system that meets your needs with the QuickDraw's seamless compatibility with three different QuickDraw reservoirs, Platypus bottles, and all 28mm plastic bottles—like smartwater®. It's the ultimate multisport water filter.

QUICKDRAW 3L GRAVITY

The QuickDraw 3L Gravity is faster to deploy and easier to use than any other gravity filter system. With a higher capacity, more accessories, and the same forward-thinking QuickDraw modular design it has the highest multi-use potential of any QuickDraw filter system.

A Better Strap

When attached, the TPE-molded strap is flexible and sturdy for hanging and carrying and will never be packed up wet. When removed, the minimalist attachment posts are unnoticeable when using in squeeze mode.

Premium Reservoir

Proprietary tri-layer construction technique is guaranteed free of plastic taste and delivers expedition-worthy durability.

Direct-to-Reservoir Connection

Direct connection to Dirty reservoir eliminates air blockage for increased flow speed.

ConnectCap™

ConnectCap has hose attachment point and threads that screw directly to 28mm bottles and Platy Bottles.

CPC Connector

Quick connector securely clicks into Bottle Adapter, a Big Zip™ Hydration Reservoir or any quick disconnect.

Bottle Adapter

Provides leak-free compatibility with a wide range of bottles for use as clean water storage.

PRODUCT FEATURES

TWO CLEANING METHODS

Shake-to-clean and tool-free backflush methods effectively maintain fast flow rates throughout a trip and into the next one.

TESTED FOR REAL WORLD USE

We use the rigorous P231 testing protocol — a 10-day process subjecting the filter to clear and worst-case water — to ensure its safety and long-lasting performance.

INTEGRITY CHECK

A simple integrity check that can be easily performed on-trail adds backcountry safety by allowing users to know if their filter has been compromised from being dropped or frozen.

INDUSTRY-LEADING RESERVOIRS

Designed for fast and easy filling, built for rugged use and guaranteed free of plastic taste, the QuickDraw reservoirs are in a league of their own. It's the Platy standard.

QuickDraw™ Filter

Compact, fast-flowing and compatible with a wide variety of bottles and reservoirs, the QuickDraw is the best water filter for your personalized filtration system.

- **Combine & Customize:** Thread design on the Dirty side and the ConnectCap™ provide seamless compatibility with a wide variety of bottles and reservoirs for easy adaptability.
- **Fast Flowing:** 3 liters per minute with squeeze pressure and 1.75 liters per minute in a gravity setup.
- **Ultralight:** Weighing just 2.4 oz (69 g), it's a perfect foundation for a customized ultralight water filter system.
- **Easy Cleaning:** Two simple cleaning methods—shake-to-clean and a tool-free backflush—remove particulates and maintain fast flow rates.
- **Safe & Effective:** Each filter is individually tested to ensure it meets all EPA & NSF guidelines for the removal of 99.9999% of bacteria and 99.9% of protozoa (Includes Giardia, Cryptosporidium, E. coli, Salmonella and Cholera).
- **Integrity Test:** Determine if your filter has been compromised from a fall or freezing by performing a simple integrity test.
- **Includes:** Dirty-side cap, DrinkCap and ConnectCap™.

QuickDraw™ 1L Filter System

With a premium 1L reservoir, a fast flow rate and an ultralight design that allows for seamless adaptability to numerous dirty reservoirs, the QuickDraw is the best personal squeeze filter system available.

- **Fast Flowing:** 3 liters per minute with squeeze pressure prevents extended stops and keeps you moving.
- **Ultralight:** The whole system weighs just 3.3 oz (95 g), delivering advanced water filtration with a minimal weight tax.
- **Easy Cleaning:** Two simple cleaning methods—shake-to-clean and a tool-free backflush—remove particulates and maintain fast flow rates.
- **Combine & Customize:** Thread design on the dirty side provides seamless compatibility with a wide variety of dirty reservoirs to allow your system to be customized.
- **Safe & Effective:** Each filter is individually tested to ensure it meets all EPA & NSF guidelines for the removal of 99.9999% of bacteria and 99.9% of protozoa. (Includes Giardia, Cryptosporidium, E. coli, Salmonella and Cholera.).
- **Integrity Test:** Determine if your filter has been compromised from a fall or freezing by performing a simple integrity test.
- **Includes:** 1L QuickDraw reservoir, dirty-side cap, DrinkCap and ConnectCap™.

QuickDraw™ 2L Filter System

With a higher storage capacity and the multi-reservoir compatibility of the ConnectCap, the QuickDraw 2L brings more flexibility to ultralight pursuits.

- **Premium Reservoir:** Included 2L reservoir is durable and free of plastic taste thanks to our proprietary tri-layer film construction.
- **Combine & Customize:** The ConnectCap™ delivers compatibility with common 28mm plastic bottles and Platypus bottles, while the hose fitted with a quick connector allows direct filtering to quick disconnect-fitted reservoirs like the BigZip™.
- **Fast Flowing:** 3 liters per minute with squeeze pressure and 1.75 liters per minute in a gravity setup.
- **Ultralight:** Weighing just 5.7 oz (161 g), it keeps things ultralight while increasing water capacity.
- **Safe & Effective:** Each filter is individually tested to ensure it meets all EPA & NSF guidelines for the removal of 99.9999% of bacteria and 99.9% of protozoa. (Includes Giardia, Cryptosporidium, E. coli, Salmonella and Cholera.).
- **Integrity Test:** Determine if your filter has been compromised from a fall or freezing by performing a simple integrity test.
- **Includes:** 2L QuickDraw reservoir, dirty-side cap, ConnectCap™, and short hose with a quick connector.

QuickDraw™ 3L Gravity Filter System

Ideal for fast-moving groups, the QuickDraw 3L Gravity delivers the same fast, simple and ultra- versatile performance the QuickDraw lineup is known for in an effortless gravity-powered design.

- **Combine & Customize:** Accessories like the ConnectCap, a hose with a quick connector and the wide and narrow-mouth compatible Bottle Adapter allow the system to be tailored and optimized.
- **Premium Reservoir:** 3L reservoir is taste-free and durable thanks to our proven construction technique and features a detachable hang strap to allow both gravity and squeeze filtering.
- **Fast Flowing:** 1.75 liters per minute in a gravity setup and 3 liters per minute with squeeze pressure.
- **Ultralight:** Weighing just 8.2 oz (233 g) it supports groups with clean water without weighing them down.
- **Integrity Test:** Determine if your filter has been compromised from a fall or freezing by performing a simple integrity test.
- **Safe & Effective:** Each filter is individually tested to ensure it meets all EPA & NSF guidelines for the removal of 99.9999% of bacteria and 99.9% of protozoa. (Includes Giardia, Cryptosporidium, E. coli, Salmonella and Cholera.).
- **Includes:** 3L QuickDraw reservoir, dirty-side cap, ConnectCap™, Bottle Adapter, long hose with a quick connector, shutoff clamp and storage bag.

Clear

DayCap™ In-Bottle Filter

For when you want to head out with easiest possible water filtration, we engineered the DayCap to seamlessly fit three popular wide-mouth water bottles and turn them into fast, safe and incredibly easy water filters.

- **Multi-compatible:** Optimized to fit Nalgene® wide-mouth bottles, HydroFlask® wide-mouth bottles, and Yeti® Yonder™ bottles.
- **Easy-to-Use Design:** With a drink spout optimized for pulling water through the filter, all you need to do is tip your bottle up like usual and drink.
- **Premium Construction:** TPE mold construction is durable and complements the quality of your bottle.
- **Proven Filtration:** Filtering up to 1 liter per minute, hollow fiber filtration media is the same technology as our most popular and field-proven filters.
- **Easy Cleaning:** Simply shake to clean with it attached to your bottle to break up particulates and restore flow rates.
- **Safe & Effective:** Each filter is individually tested to ensure it meets all EPA & NSF guidelines for the removal of 99.9999% of bacteria and 99.9% of protozoa. (Includes Giardia, Cryptosporidium, E. coli, Salmonella and Cholera.).
- **Expertly Engineered:** Filter detaches with an easy half-turn for cap-only mode; spout shape is optimized for drinking and pouring; semi-flexible carry loop is a sturdy attachment point.

Hoser™ Reservoir

Ultralight, taste-free, with a high flow rate—the Hoser is the perfect minimalist reservoir.

- **High-Flow Bite Valve:** The self-sealing HyFLO™ bite valve delivers a 30% increase in flow rate from the previous Hoser, making it quick and easy to hydrate on the go.
- **Versatile:** Classic threaded port and 1/4" dia. drink tube make it compatible with accessory caps and adapters.
- **Secure:** Integrated hanger and carry loop secure the reservoir in a backpack.
- **Taste-Free & Durable:** Our proprietary tri-layer film uses a rugged thermoplastic polyurethane outer layer and a taste-free polyethylene inner layer.
- **Microbe-Resistant:** Embedded silver-ion protects reservoir from mold and bacteria.

Big Zip™ EVO Reservoir

Premium taste-free, high-flow reservoir loaded with features for easy on-the-go hydration. The Big Zip EVO delivers a 50% increased flow rate from the previous Big Zip, making it the fastest-flowing, taste-free reservoir available to backpackers, hikers and mountain bikers.

- **Fast & Easy:** The self-sealing HyFLO™ bite valve, leak-proof shutoff valve and large 5/16" dia. tubing contribute to fast flow and ease of use.
- **Quick Access:** Low-profile shape and high-mount drink tube quick-disconnect make it easy to load/unload.
- **Easy to Fill & Clean:** Wide opening and one-handed grip eases filling and cleaning.
- **Microbe Resistant:** Embedded silver-ion protects reservoir from mold and bacteria.
- **Taste-Free & Durable:** Our proprietary tri-layer film uses a rugged thermoplastic polyurethane outer layer and a taste-free polyethylene inner layer.
- **Quicker Drying:** Semi-rigid baffle helps keep reservoir open, ensuring quicker drying with less fuss.

WATERPROOF YOUR ADVENTURES

SIGNATURE TECHNOLOGIES

RADIO FREQUENCY (RF) WELDED SEAMS
Radio frequencies are employed to bond fabric together at the molecular level. This strong, long-lasting, reliably waterproof construction method withstands up to 2x more stress than sewn-and-taped seams, which can fail over time allowing water to pass through the materials.

DRYSEAL™ CLOSURE
Our easy-to-use, dual-strip system amplifies roll-top closure protection while making it intuitive to achieve an optimal seal for the best waterproof protection.

SEALOCK™ CLOSURE
Discreet and easy-to-use dual-track zipper closure seals tight for confident submersible protection.

CONTINUOUS COMPRESSION
Unlike conventional systems that pull against seams, our Continuous Compression system encircles the sack to minimize seam strain, maximizing durability for dependable protection.

WATER PROTECTION RATINGS

SPLASHPROOF
Protects gear from light rain and splashes.

WATERPROOF
Protects gear from heavy rain and soakings.

SUBMERSIBLE
Protects gear from full water submersion – withstands 1 meter of water for 30 minutes.

EARTH-FRIENDLY MATERIALS

PVC-FREE
We actively pursue the sourcing of PVC-free alternatives in some of our most popular products. A smaller eco-footprint and premium performance make it a win-win for all concerned.

Pro™ Dry Pack

Our most supportive & comfortable large-capacity waterproof pack for big river running, frequent portaging and worry-free expedition travel, with a heavy-duty suspension system.

- **Waterproof:** Ultra-durable waterproof materials & welded seam construction for confident protection.
- **Full-Length Support:** Full-length framesheet transfers weight to the waist belt for optimal load support.
- **Premium Comfort:** Soft-edged padded shoulder straps, full-length breathable back panel padding, lumbar padding, and padded waist belt ensure comfort when hauling massive loads.
- **Tailored Fit:** Suspension system adjusts between three sizes—S, M, L—to fit torso lengths 17 in, 19 in and 21 in (43 cm, 48 cm and 53 cm).
- **Better Bottom:** Reinforced bathtub bottom delivers the ultimate in durability.
- **Light-Colored Interior:** Eases identification of contents.
- **Streamline-able:** Shoulder straps and waist belt can be removed for a sleek profile.

SIZE	70 L	120 L

Black Canyon™ Dry Pack

Large capacity, suspension system & versatility make it a solid choice for any adventure where dry protection and comfort matter.

- **Waterproof:** Ultra-durable waterproof materials & welded seam construction for confident protection.
- **Balanced Comfort:** A “just right” amount of support subdues moderate loads via padding on shoulder straps, waist belt, back and lumbar areas.
- **Light-Colored Interior:** Eases identification of contents.
- **Tight, Simple Sealing:** DrySeal™ roll-top closure makes it easy and intuitive to achieve an optimal seal and secures with side compression straps.
- **Streamline-able:** Shoulder straps and waist belt can be removed for a sleek profile.

PackTowl®

**TOP-TIER
QUALITY FOR
NEXT-LEVEL FUN**

PERSONAL ARTIST SERIES COLLECTION

Gianna Andrews

There are times where we would prefer to be out in nature, but life keeps us inside. Drawing on personal experience, Gianna's work for PackTowl's Artist Series transports us to where we would prefer to be: immersed in the natural world.

Artist of Desert Aire

Kristina Wayte Bakke

With her signature blend of energetic lines and expressive brush strokes, Kristina's work for PackTowl's Artist Series captures the world of movement in which all outdoor adventurers live.

Artist of Flow and Daydream

Shogo Ota

With an unmistakable aesthetic informed by the art found in tiny everyday details, Shogo highlights the PNW he calls home for PackTowl's Artist Series and evokes the fun and vibrant adventure lifestyle it inspires.

Artist of Orca and Mystic Moose

Emily Kelley

For PackTowl's Artist Series, Emily contemplated the many places a towel will go and the human experiences it will witness. Her work evokes the essential peace in vulnerability we find when we connect with nature.
